BIOLOGICAL GEL FOR CLEANING AND MAINTENANCE OF
BATHROOM INSTALLATIONS, SINKS, PIPE LINES

DESCRIPTION :

Cleaning agent, descaling agent, sanitizer and deodorant for pipe lines and toilet bowls, wall tiles, washbasins, bath tubs.

APPLICATIONS :

- Cleans (cleans and shines your bathrooms, removes any encrusted dirt).
- Provides lasting freshness by deodorizing with the help of natural essential oils.
- Sanitizes (bacterial action of the essential oils on reference strains - a bleach is no longer required).
- Descals and cleans mineral scale (limestone) and organic scale (uric scale).
- Cleans the septic tank.

Using ACTIBIO GEL results in :

- The activation of the septic tank by releasing the micro-organisms encapsulated on contact with the septic tank for an activation within.
- The micro-organisms (10^7 cells/ml) prevent odours and reduce tank service.

METHOD OF USE :

Use Actibio Gel with a sponge for the cleaning of all your sanitary facilities and wall tiles. Pour the equivalent of 1 caps of Actibio Gel in each pipes to avoid scale formation and suppress unpleasant smells.

The last application is preferably done during the night, to enable the gel to fix to the walls and enable the micro-organisms to start their descaling action. Do not pour water after the application of Actibio Gel in the pipes.

PRECAUTIONS :

- Product for professional use. Consult MSDS (upon request only).

In compliance with
Norm 2000/54/EC
