

QUICKLY

THE HIGH QUALITY MICROFIBER CLOTH

DESCRIPTION :

The microfiber cloth QUICKLY facilitates the cleaning and wiping of several surfaces such as glasses, enamel or stainless steel, and this, thanks to its extra absorbing and antistatic power. It is convenient, cost-efficient and easy to use.

METHOD OF USE :

The microfiber QUICKLY can be used dry or wet. Indeed, the cloth attracts dust on all surfaces thanks to its electrostatic power. Wet, it facilitates the efficient cleaning of greases which were deposited on the surfaces to be treated. When adding a cleaning product, the efficiency of the used product increases tenfold and enables to divide the product quantities to use (environment protection and cost saving).

Thanks to its efficiency, the QUICKLY cloth enables a fast cleaning, without any effort and without risk for the surfaces to be treated.

PRECAUTIONS :

Do not use bleach or even softener because these two products deteriorate the microfiber cloth's quality.

The microfiber cloth QUICKLY can be machine-washed.
